

CRANIOMANDIBULAR INTEGRATION in Daily Clinical Practice

- ✓ Learn how to integrate diagnostic and treatment planning protocols for **Cranio-mandibular Patient Management** into your daily clinical practice.
- ✓ Observe the **dynamics** of first appointments, follow-up visits, and diagnostic procedures with real patients.
- ✓ Participate in step-by-step Clinical **Case Analysis** sessions.
- ✓ **Management** is also essential: we will teach you how to design and present treatment plans, including structure, costs, and patient follow-up from beginning to end.

✓

DAY 1 – Clinical Dynamics

- Thursday morning: Management of patients undergoing treatment and first appointments with an approach based on **Occlusion Medicine**.
- Thursday afternoon: Attend **Condylography sessions** with real patients (groups of 3 participants, two patients simultaneously), articulator mounting using Anatomical and Kinematic Facebows, and learn how to transition from analog to digital workflows.

DAY 2 – Step-by-Step Case Analysis

- Friday morning: You will learn, through a structured protocol, how to analyze cases and organize **multidisciplinary treatment planning** and sequencing. Become the director of your patients' treatment.
- Friday afternoon: We will reinforce key theoretical concepts to **consolidate** your understanding of **Occlusion Medicine**.

DAY 3 – Management & Administrative Follow-up

Saturday morning: A practical approach to effectively implementing protocols in the clinic. Workflow organization: who is responsible for each step. In addition, guidance on cost management, treatment plan design, and most importantly... how to communicate the **VALUE** of a truly comprehensive treatment to the patient.

GROUPS LIMITED TO A MAXIMUM OF 6 PARTICIPANTS
